

RESEARCH COORDINATORS – DEPARTMENT OF PSYCHIATRY, STONY BROOK UNIVERSITY. Full-time paid positions are available for a National Institute of Mental Health-funded study led by Drs. Roman Kotov (Departments of Psychiatry and Psychology) and Daniel Klein (Department of Psychology). This is a longitudinal study of a cohort of 550 early adolescent girls who are being followed into their mid-20s. The current project focuses on the course of adolescent depression, particularly psychosocial and neural factors that predispose to and/or maintain persistence and recurrence.

Applicants should have a Bachelors or Masters degree, preferably in Psychology or a related field, and experience in research with human participants. Preferred qualifications include experience working with individuals with psychiatric disorders in research or clinical contexts and experience recruiting/scheduling participants for research studies. Applicants must have excellent interpersonal and time management skills.

Responsibilities will include conducting diagnostic and life stress interviews, acquiring EEG/ERP and MRI data, scheduling participants, managing data, maintaining study protocol documents and IRB compliance, and training and supervising undergraduate research assistants. Applicants should expect to make a two-year commitment. Start date is somewhat negotiable but must be during Summer 2024.

Send a cover letter and resume to Daniel N. Klein, Ph.D., Department of Psychology, Stony Brook University, Stony Brook, NY 11794-2500, email: daniel.klein@stonybrook. Applications will be reviewed on a rolling basis.

STONY BROOK UNIVERSITY IS AN AFFIRMATIVE ACTION/EQUAL OPPORTUNITY EDUCATOR AND EMPLOYER. Applications from women, people of color, individuals with disabilities, special disabled veterans or Vietnam veterans are especially welcome.
