### **Full Time Laboratory Coordinator Position in Child Clinical Psychology at University of Massachusetts, Amherst**

Dr. Adam Grabell is seeking a full-time coordinator for the Self-Regulation, Emotions, and Early Development (SEED) lab at the University of Massachusetts, Amherst. The coordinator will assist in running two studies: An NIMH K23 grant investigating neural mechanisms of emotion regulation and emerging psychopathology in early childhood, and a study using wearable devices and home-based data collection to measure preschool tantrums.

Responsibilities include collecting functional Near-Infrared Spectroscopy (fNIRS), galvanic skin response data, and data from wearable devices, in preschool children with and without psychopathology, participant recruitment and scheduling, IRB management, and overseeing a team of undergraduate assistants. The coordinator will also have the opportunity to participate in conference presentations and manuscript preparation. **The position is ideal for anyone looking to pursue a PhD in child clinical psychology, developmental psychology, neuroscience, or medical school.** The position is a minimum of one year, with a second year contingent on federal funding. Flexible start date. Salary, duties, requirements, and application submission can be found via the link below:

A minimum of one year experience in a research lab is required. A bachelor's degree in psychology, neuroscience, or a related field is preferred. Candidates with experience working with young children are strongly encouraged to apply.
