

Research on Affective Disorders and Development

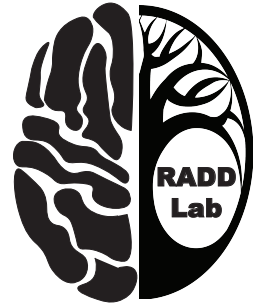

Project Leader Position in the RADD Lab

The Research on Affective Disorders and Development (RADD) Laboratory in the Department of Psychology at the University of Colorado Boulder, directed by Dr. Roselinde Kaiser, is seeking to hire a Project Leader (Professional Research Assistant) with skill in clinical or neuroscience research and database management.

In the RADD Lab, we investigate brain functioning and mood disorders like depression across the lifespan. The lab uses behavioral, neuroimaging (fMRI), and clinical approaches to address our research questions.

This position in the RADD Lab will support a set of new and ongoing studies that investigate core neurocognitive markers that predict resilience and mood problems in adolescents and young adults. The position will be primarily focused on research recruitment, acquiring behavioral, app-based, EMA and neuroimaging data, and database management. Specific responsibilities will include recruiting and scheduling participants for clinical and neuroimaging research sessions (e.g., healthy individuals, individuals with depression or other mood disorders), data collection (computer-based, mobile app, MRI), and database management (using web applications such as RedCap; or statistical programs such as R), as well as support for general management of lab operations.

The position requires (1) a BA/BS in Psychology, Neuroscience, Computer Science, Engineering, or related field, (2) research experience in the mental health space, (3) demonstrated ability to perform as an independent researcher (e.g., undergraduate thesis), (4) some experience with R, unix, python, matlab or another programming language.

Successful candidates will have strong oral and written communication skills, excellent organizational skills, be highly reliable, and enjoy working in a collaborative team atmosphere. In addition, they will have a demonstrated ability to multi-task efficiently and to coordinate activities across different research labs and investigators.

Positions are full-time. Start date is flexible.

Review of applications will begin immediately and will continue until the positions are filled.

Interested applicants should email us at raddlab@colorado.edu with their CV and a cover letter describing their research interests and career goals.

The University of Colorado Boulder is an Affirmative Action Equal Opportunity Employer and encourages women, minorities, economically disadvantaged and persons with disabilities to apply.

Thank you for considering our position!
