

Job Description

Clinical Researcher I - (STA014442)

Organization H0125 Psychology

Description

Provides expertise in support of physical or mental health research projects. Typically works out of a clinic or other health care facility and may travel to homes, schools or residential facilities to collect data. Performs advanced testing procedures, data collection, and analysis. Typically works directly with human subjects. Ensures experiments are performed according to specifications. May make recommendations to changes in procedure, processes, or experimental design. May prepare and/or edit research papers, grant proposals and reports. Duties: Work is varied and somewhat difficult. May assist in advanced functions as part of training. Supervision: Receives direct supervision but is expected to learn how to select from a variety of standard procedures to complete tasks.
