

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

**POST BACCALAUREATE
RESEARCH ASSISTANTS—UNC
CHAPEL HILL**

We are seeking 2 full-time post-baccalaureate Research Assistants in the Department of Psychology and Neuroscience at UNC Chapel Hill to work on a joint project with Drs. Eva Telzer and Kristen Lindquist. Research Assistants would work on a unique dataset that combines theories and methods in developmental neuroscience (longitudinal fMRI data), social affective neuroscience (emotional processing, social interactions), health behaviors (health risk behaviors, internalizing and externalizing disorders), and social media and technology use.

We specifically are looking for:

- BA-level researchers with skills in recruitment, screening, and data collection with child and adolescent participants and their families who wish to gain more experience in research for graduate school.
- Fluency in spoken and written Spanish is highly desirable.
- Applicants must have a BA/BS in Psychology, Neuroscience, or related field by the time the position begins.

The position also includes opportunities for professional development and unique interdisciplinary training that will be useful for a variety of academic career paths. The position starts summer of 2024.

Applicants should submit a CV, cover letter, and list of 2-3 references for initial review to teentechunc@gmail.com. Please consolidate into one pdf. For bilingual applicants, please state explicitly in your cover letter level of fluency in written and spoken Spanish. For more information about our ongoing research, see:
