

Research Coordinator for the Georgetown Laboratory for Relational Cognition

Employer

Georgetown University

Department

Department of Psychology

Job Description

The [Georgetown Laboratory for Relational Cognition](#), directed by Adam Green, anticipates hiring a research coordinator. The position will focus on an NSF-funded study of concept development and reasoning in real-world high school education, and will also involve contributions to lab-based studies on cognitive and neural mechanisms of creativity. Responsibilities will include outreach to students and families as well as teachers and school administrators. Depending on level of interest, the research coordinator will have substantial opportunity to engage with all aspects of the project, including collection and analysis of behavioral and brain-imaging data. This project seeks to contribute to bridging the gap between the real-world classroom and the cognitive neuroscience laboratory.

Applications will be reviewed on a rolling basis until the position is filled. The preferred start date is Summer 2024.

Please follow the instructions at the provided link to apply for the position.

****PLEASE NOTE:** We have listed this position as full-time because the APS site requires a full-time or part-time designation, however the full-time or part-time determination for this position will be made based on funding availability in 2024. This determination will be clearly communicated to applicants at the interview phase before an offer/decision is made.**
