

## **Two Full-Time Research Coordinators at Binghamton University (SUNY) Mood Disorders Institute**

The Binghamton Mood Disorders Institute, directed by Dr. Brandon Gibb, is seeking to hire two full-time post-baccalaureate Research Assistants to start as soon as June 3, 2024. These are a full-time grant-funded positions to assist with an NIMH-funded R01 examining mechanisms of risk for the intergenerational transmission of depression during the transition from childhood to adolescence. Duties will include coordinating participant recruitment, preparation of study materials, and conducting participant assessments (diagnostic and life events interviews, computer-based and mobile eye tracking, psychophysiology, EEG/ERPs, etc.). The research assistant will also have opportunities to co-author scientific papers and journal articles. Salary will be \$33,800 per year plus health insurance. For more information about the lab, please visit [depression.binghamton.edu](https://depression.binghamton.edu)

Qualifications include a BA/BS in psychology or other scientific field, including coursework in research methods and/or statistics. Successful candidates will demonstrate a conscientious work style and strong interpersonal skills. Candidates with experience with eye tracking, EEG/ERP, psychophysiological assessments, and/or structured diagnostic interviewing are particularly encouraged to apply. This is an excellent position for a college graduate who is interested in gaining additional research experience before going on to graduate study in clinical psychology.

Review of applications begins immediately and will continue until the position is filled.
